Marsden PT-600: Weigh pallets and record the weight - instantly

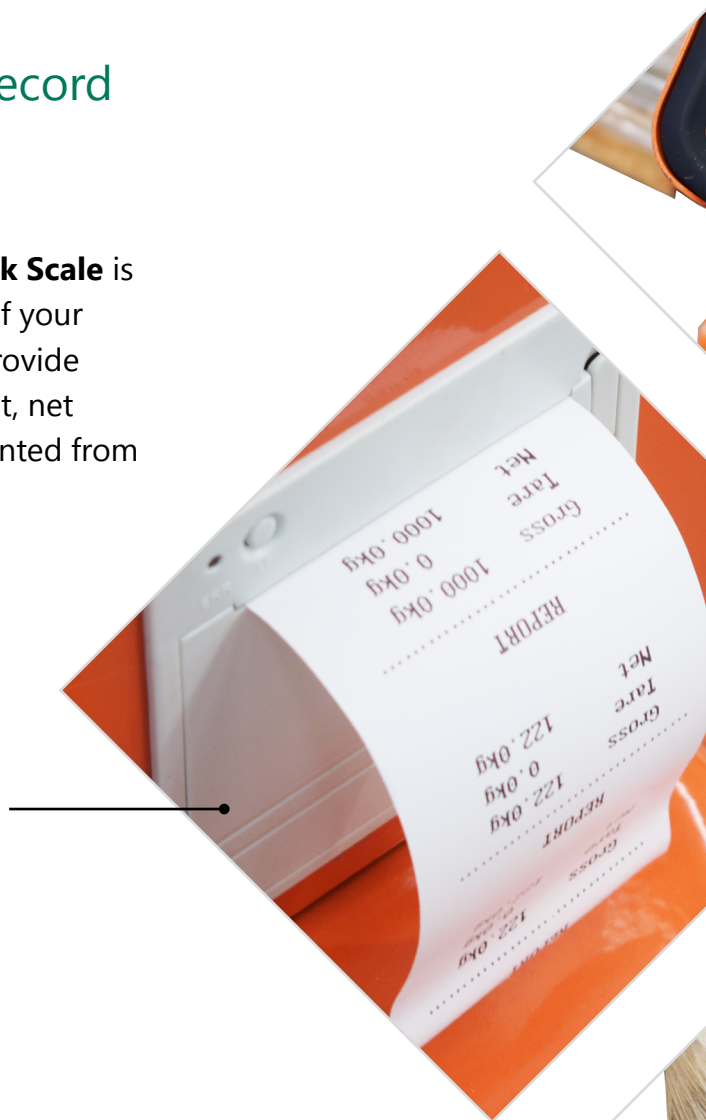

The rugged, high capacity **Marsden PT-600 Pallet Truck Scale** is the simple, time-saving way to get an accurate weight of your palletised goods. Four load cells in its mild steel forks provide weight readings to the nearest 500g - then, gross weight, net weight, tare weight and count information can all be printed from its onboard printer.

Keep track of every weight reading

The built-in printer on the PT-600 allows you to print gross weight, net weight and tare weight, as well as count information when the scale is in counting mode. Select the accumulation function and you can print the total weight of a number of pallets, too - helping you to avoid overloading of lorries.

Accurate weighing up to 2000kg

Right up to two tonnes, the PT-600 will give you an accurate weight reading of your goods, thanks to **four heavy duty loads cells** in its **mild steel low profile forks**. Don't want the reading in **metric**? Just switch the display to **lb readings**. Weighing several pallets for one shipment? The PT-600 will **add up the individual weights** when you select the accumulation function.

Long-life internal battery for extra flexibility

The **internal rechargeable battery** of the PT-600 will last upto 40 hours. However, a **programmable auto power-off** and **indicator screensaver** will save battery life, meaning you can use the PT-600 for longer between charges.

Key features

Tare

Hold

Accumulation (of pallet weight)

Counting mode

Weight percentage mode

Unit switchable

Built in printer - prints weight, count and accumulation data

Four heavy duty load cells

32mm high bright red LED display

Programmable auto power-off/screensaver

Low profile forks

Easy access functions

The PT-600 is packed with easy to use features making weighing even easier. **Tare** will allow you to remove the weight of the pallet from the reading. **Hold** will stabilise the weight reading even if your load is moving around. A simple **counting function** allows you to add up items on a pallet quickly and easily.

Specification

Capacities/graduations: 2000kg x 500g

Fork length: 1150mm

Ground clearance: 78mm

Power: 6v 4.5A/Hr rechargeable battery

Adaptor: 7v 1000ma mains adaptor

Weight of scale: 125kg
